# HEALTH RECOMMENDATIONS

## Gradually reduce your training

After so much training it is normal to feel tired. Training should be increased gradually so that you don't suffer prolonged exhaustion and as you get closer to the event remember to reduce it so that your body can recover.

## Don't overdo it with the breakfast and do not experiment

The most important thing to make sure that you don't feel bad, that you have the strength you need to face the race and that you know what Works for you, is the rule of not experimenting

## Do not try new material

No new shoes, no new clothes, no last minute ideas. Just do what you've been doing for the last few weeks and everything will go smoothly.

## Set yourself an approximate and realistic objective

Even if it is your debut in the triathlon, it is advisable to start with an idea of the goal time that you want to achieve from the beginning because it will help you to stay focused and forget about fatigue and tiredness, but without obsessions.

## Do not be discouraged if at some point you have to slow down the pace

Each segment is different and your level may not be the same in each of them. That is why, if you have to slow down at some point in the race, do not worry, because you will pick it up again at another point.

## It is your race, not someone else's, that's the most important thing

No one but you know how you feel during the race, the idea you had from the beginning, the goal you set yourself, etc. You have to do your own race. If you have to keep a specific pace, stick to it even if there are other participants who overtake you during the race. You have to stay strong and stick to your own pace.

## Nutrition

First of all, it is important to have enough fluids and carbohydrates to be able to take part in the race without any deficiency. On the other hand, proper nutrition and hydration are essential during the race.

It is very important that throughout the race you hydrate yourself. Once at the finish line you will have a complete liquid and solid refreshment to recover your energy.

Remember that if you use your own supplements during the race it is ideal to take them followed by liquid. Of course, it is very advisable, almost essential, to have tried these protocols and specific products in previous training sessions, in case our body does not adapt or assimilate them.
